PROFESSIONAL SUMMARY

Dynamic Senior Web Developer with 20+ years of experience building and optimizing user-focused, responsive websites and web applications. Collaborates with cross-functional teams to transform complex data into intuitive, accessible digital products. Adept in HTML5, CSS3, JavaScript, Bootstrap, React, and WordPress. Known for strong communication, leadership, and project management skills, having managed development teams. Seeking a front-end development role or manager role where I can leverage my extensive experience to deliver high-quality, impactful web solutions and provide exceptional user experiences.

EXPERIENCE

Technical Designer, EA SPORTS - Madden Ultimate Team Live Services
- Orlando, FL (Remote)
8/13/2023 to 1/31/2025

- Led server content migrations and managed live content creation: Contributed to the development of the Zero Chill Program, designing 40 solo challenges, various GIC items, and alternate currency items, enhancing player engagement.
- Utilized SPLUNK queries for data analysis and debugging: Analyzed data to identify and resolve issues, leading to improved workflows and system efficiency.
- Collaborated with cross-functional teams to deliver digital goods: Worked with designers, engineers, and content developers to create scripts and used proprietary tools to successfully deliver digital goods to millions of players worldwide.

Front End Developer, International Monetary Fund (IMF)/World Bank,
Washington DC, USA (Remote - Contract)
09/2018 – 12/17/2024

- Developed and optimized responsive web applications for IMF and World Bank platforms using HTML5, CSS3, React, and Bootstrap, improving user interaction and load times.
- Collaborated with UX/UI designers, graphic designers, behavior scientists, and economists to transform complex data from Excel spreadsheets into digestible and interactive web applications, increasing efficiency by 50%.
- Troubleshoot and resolved performance issues in mobile and desktop applications, enhancing functionality by implementing optimized data scripts.

SKILLS & TECHNOLOGIES

- **Front-End Languages & Frameworks:** HTML5, CSS3, JavaScript, JQuery, React and Bootstrap. Proficient in WordPress Development & Elementor.
- **Design & UI/UX Tools:** Figma, Adobe Creative Suite, Visual Code

- **Live Team Collaboration:** History of working effectively in live team environments.
- **Communication Skills:** Strong ability to communicate technical information effectively to non-technical audiences. Experience in presenting project details and updates to managers, and collaborating with design teams.
- **Management & Leadership:** Team leadership, project planning, empowering developers under my management.

EXPERIENCE

Branch Chief/IT Manager/Web Developer, U.S. Census Bureau - Internet Support and Service Branch, Washington DC, USA

12/2016 – 06/2018

- Managed and mentored a 9-member team of Web Developers responsible for migrating and maintaining intranet websites across four divisions, ensuring compliance with SharePoint and AEM standards.
- Developed new procedures for content management using Adobe Experience Manager(AEM), leading to improved efficiency in managing complex systems.
- Conducted stakeholder briefings and implemented governance protocols for the Economic Migration Project, ensuring seamless content migration, site integration, and on-time delivery.

SharePoint Collection Administrator, U.S. Census Bureau - Internet Support and Service Branch, Washington DC, USA

12/2012 – 12/2016

- Managed and configured SharePoint infrastructure for the organization, providing governance and developing custom workflows using Nintex and SharePoint Designer.
- Spearheaded a group of 7 SharePoint Team Site Administrators to implement governance, best practices, enhance knowledge sharing, and consistency in SharePoint use throughout the Directorate.

IT Specialist/Web Developer, U.S. Census Bureau - Internet Support and Service Branch, Washington DC, USA

11/2004 – 12/2012

- Spearheaded a team of 5 IT Programmers/Web Developers to design and deploy Intranet websites for the Economic Directorate.
- Delivered exceptional customer service support and training for website maintenance, enhancing user satisfaction.

Freelance Web Developer, RGG Studio LLC, Waldorf, United States

04/2004 – Present
